

The story of Jassas continued

Over AED 38,500 was raised to aid in the treatment of Jassas and we are thrilled to announce that the surgery was successful. Jassas is now recovering back in Al Barsha Veterinary Clinic and will hopefully soon be re-homed to one of you who have so generously and overwhelmingly offered support and offered a home for him.

The British Veterinary Clinic in Abu Dhabi, Dr. Jonathan Hale, have besides wonderful high quality specialistic orthopedic surgery, also contributed towards Jassas future by reducing their initial surgical cost of 13.000 AED to 6.000 AED. Thank you so much for this BVC, Dr. Jonathan!

Unfortunately there are many cases similar to Jassas' and we would like to use the remainder of your generous donations in the post-operative care of Jassas as well as for future situations like this. We therefore have set aside the remainder of this money in our 'ABVC - Rescue Fund'.

Al Barsha Veterinary Clinic would like to thank each and every individual who contributed to saving this beautiful dog. We will continue to keep you updated and hopefully in the near future, Jassas will be running, playing and enjoying life the way a dog should.

We will keep you updated on Jassas's progress.
