

# Labrador Retriever

(add from Royal Canine >>)

## A really charming dog, full of life

The indefatigable **Labrador Retriever** is full of energy. He loves swimming, or long walks with his owners. His endurance, linked to his outstanding visual and cognitive capacities make him an ideal guide dog. Ever enthusiastic, intelligent and well-balanced, he is very docile and particularly good with children. The Labrador is well built, athletic, brave and always at home in the water, the Labrador Retriever has many characteristics and physical abilities directly linked to his heritage as a working dog.

His coat has dense, short hairs, with a thick undercoat... the structure of the Labrador Retriever's waterproof coat protects him from scratches and insulates him from the cold, such as in the water, because the water just slides off without penetrating the coat.

The Labrador Retriever can be particularly greedy when there is plenty of food around. If he is sedentary or sterilized. His solid body, strong bones and his natural predisposition to gain weight are among the factors which can weaken his joints.

### Labrador Retriever 33 – Junior

This new product contributes to healthy development of the Labrador puppy's:

- strong bones thanks to an adapted intake of energy, proteins, calcium and phosphorus. It helps to support its joints at an early age to the action of chondroitin, glucosamine and EPA & DHA.
- Helps to maintain the Labrador's ideal weight from a very young age.
- Promotes equilibrium of the intestinal flora due to prebiotics and Psyllium.
- Helps to support the young puppy's natural defences.

### Labrador Retriever 30 - Adult

This new product contributes having a healthy Labrador:

- Helps to maintain the Labrador's ideal weight by combining an increased protein rate (30%) with a low fat intake (13%) and L-Carnitine to aid the metabolism of fats.
- An exclusive kibble whose shape and formula (barley and psyllium) promotes a feeling of fullness.
- Helps support the Labrador's strong bone structure
- Reveals the beauty of a unique waterproof coat and helps maintain the "barrier" role of the Labrador's skin.
- Supports the eyes antioxidant defences (Lutein, zeaxanthine, Vit. E & C).
